Exhibition Systems

THE TOTAL MODULAR EXHIBITION SOLUTION

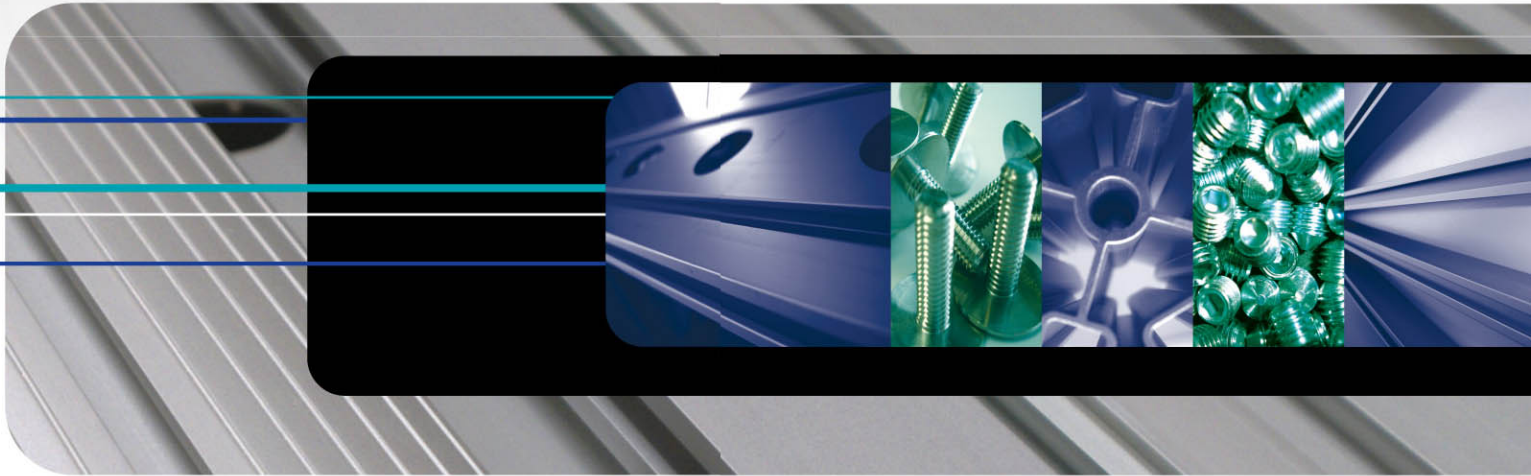

Linx
Exhibition Systems

THE LINX CONCEPT

From a freestanding banner unit to a double deck, to be hired for a single event or purchased for a multi-year series of shows, the Linx Modular Exhibition System can suit every requirement.

THE LINX SYSTEM

The Linx Modular Exhibition System is made from anodised extruded aluminium, with a large selection of standard profiles to facilitate re-configuration of existing stands, and a range of standard and customised accessories to make sure you stand out at any show.

THE LINX SERVICE

From your initial brief we offer a free CAD design service, backed up by our in-house production, installation, stand storage and full show management.

THE LINX EXPERIENCE

With over 20 years experience in designing and building exhibition stands throughout the world, we have the in-house knowledge and resources to make your exhibiting experience an enjoyable one!

THE LINX DESIGN PROCESS

From initial creative concept through to production and installation:

Linx is a cost effective and environmentally viable solution to all your exhibiting needs...

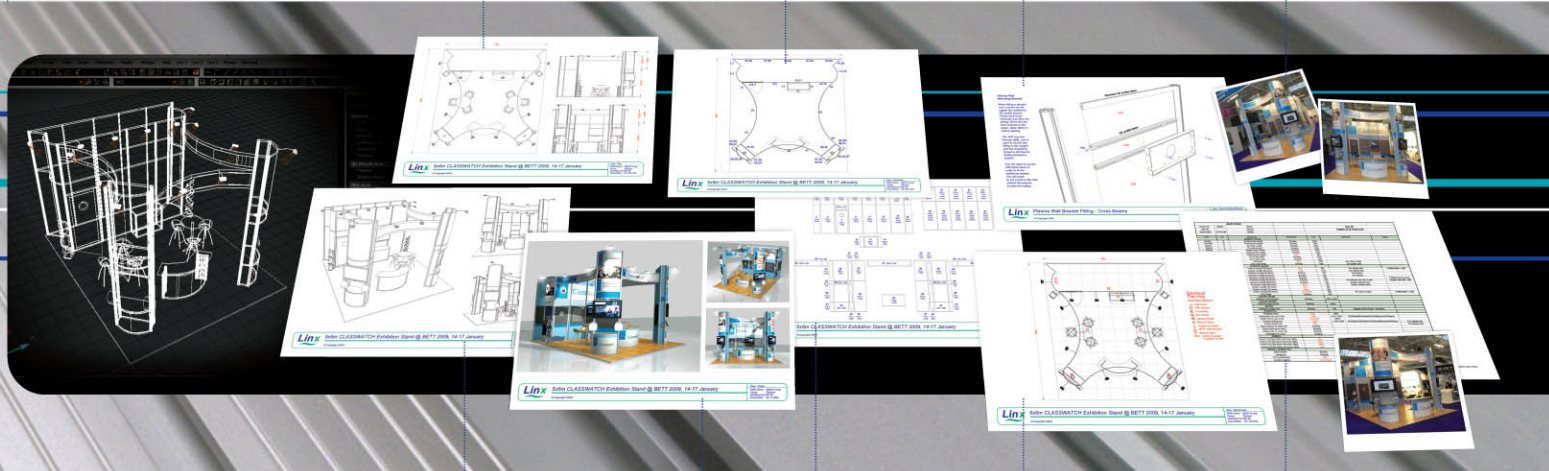

From the initial brief we can produce a creative solution to meet and enhance your marketing plan fulfilling your individual requirements on budget and on time!

All plans are produced from Autocad using our own programmed system. This ensures all plans are accurate, cost effective and produced on time.

The panel layout is numbered to ensure that graphic designers and installers know the location of each panel.

When required, detailed assembly instructions can be provided to simplify installation.

Digital photographs are taken and stored for ease of future reference.

Stand plans and elevations are produced for every stand we design, for submission to the show organisers for approval.

A colour render helps to visualise the final look and feel of the stand.

Each panel size is clearly shown to assist with the design and layout of the graphics.

The electrical plan details the location of each power socket, internet points and AV requirements to ensure accurate ordering and placement of on-site services.

A full list of every component required is produced for each stand. The stand is checked against this list when going to site and again when being returned to storage.

The Linx Design Process details every stage from concept to completion, and ensures accurate records for your next stand requirement.

INDUSTRY LEADERS IN QUALITY & SERVICE

The Linx Modular Exhibition System provides you with creative freedom through its range. The limit to which you can develop designs & create impactful structures is equalled by our commitment to fulfilling your requirements and supporting you with our project management & quality of service.

From the initial enquiry, our experienced team will discuss your requirements and start the creative proposals.

Our design team will supply detailed CAD designs, 3D colour visuals, plans, elevations, panel plans & layouts, electrical plans – everything that is required to progress the finished stand!

Our in-house production team also run a CNC router – this allows us the freedom to add bespoke elements to your design.

Our experienced and dedicated team of installers provide install and breakdown services in the UK, Europe and Worldwide.

The Linx raised floor system is the quickest and easiest way to add a raised floor to your stand.

With years of experience dealing with electrical and AV contractors, you can be confident in our ability to manage the smooth running of your stand.

Once the stand is completed, checked and cleaned down – we're ready to handover to you for the open event!

After your exhibition, rest assured that your exhibition system and graphics are stored in our warehouse facility, ready for the next event.

CREATIVITY IN EXHIBITION STANDS

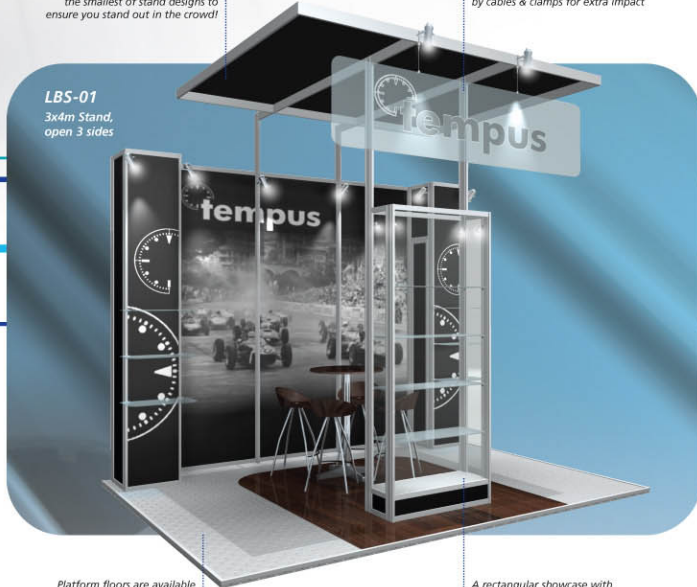

CREATIVITY IN EXHIBITION STANDS

Linx is constantly evolving and developing new ways to produce the most cost effective and creative small stand designs

A canopy structure can be added to the smallest of stand designs to ensure you stand out in the crowd!

Use acrylic display panels suspended by cables & clamps for extra impact

LBS-01
3x4m Stand,
open 3 sides

Platform floors are available with a range of floor coverings to add extra interest to your stand design.

A rectangular showcase with locking door, internal shelves and internal lighting will highlight your products on display

Even in a small space, a Linx stand helps you to make a large impact.

CREATIVITY IN EXHIBITION STANDS

Linx has been designed to meet the most challenging brief; your stand design will be created using our extensive range of profiles, beams and accessories.

A fabric casement ceiling structure is a great aesthetic feature

Circular AV pods on the perimeter edge are a great way to grab the attention of the exhibition visitors.

CREATIVITY IN EXHIBITION STANDS

No matter what your stand space is, Linx will create the structure and endless configurations to ensure you have the flexibility you require.

Having walls and ceilings at different heights draws the eye and can accentuate specific areas of your stand.

Secure storage solutions are a necessity when offering hospitality and promotional merchandise.

LBL-01
8x6m Stand,
open 2 sides

A stylish reception counter with company branding gives a great first impression when meeting and greeting.

Use different print media to work with the stand; large banners for graphic impact and acrylic/foamex infills to enhance specific areas.

Enhance your design with stylish Linx lighting. Backlighting can be used to draw attention to logo panels or specific areas of your stand.

The Linx Modular Exhibition System will meet every conceivable need; we will fulfil all your requirements with our quality of service and commitment...
